Internet!](#)

May, 2024

The Broadband Committee has been working with Axiom, CMP, Consolidated, the Maine Connectivity Authority, and the Town of Chebeague to deliver high speed fiber Internet service available to every home and business on the Island by July, 2024.

Construction of the new Chebeague Fiber Network started in April of 2024 – the pole owners (CMP and Consolidated) have made the necessary adjustments on the poles around the island.

The Network will give everyone on the island access to internet speeds ranging from 50 megabits/sec to 1 Gigabit/second, depending on their desires/needs, and should be operational by late Summer or Fall.

Information on what the installation at your house will look like is available on the [“Installation”](#) tab of this site.

The Network is now ready for signups! Free installation by Axiom is only available at the time of the initial roll-out, after which time they must charge over \$300 to do so, so act quickly! More information regarding costs and details is available on the [“Signup”](#) tab, or call Axiom at:

207-255-0679

Update:

Just before New Years, we received our first load of material on a 53’ flat bed:

- 7 large fiber reels
- 9 medium size fiber reels
- 6 pallets of metal strand cable

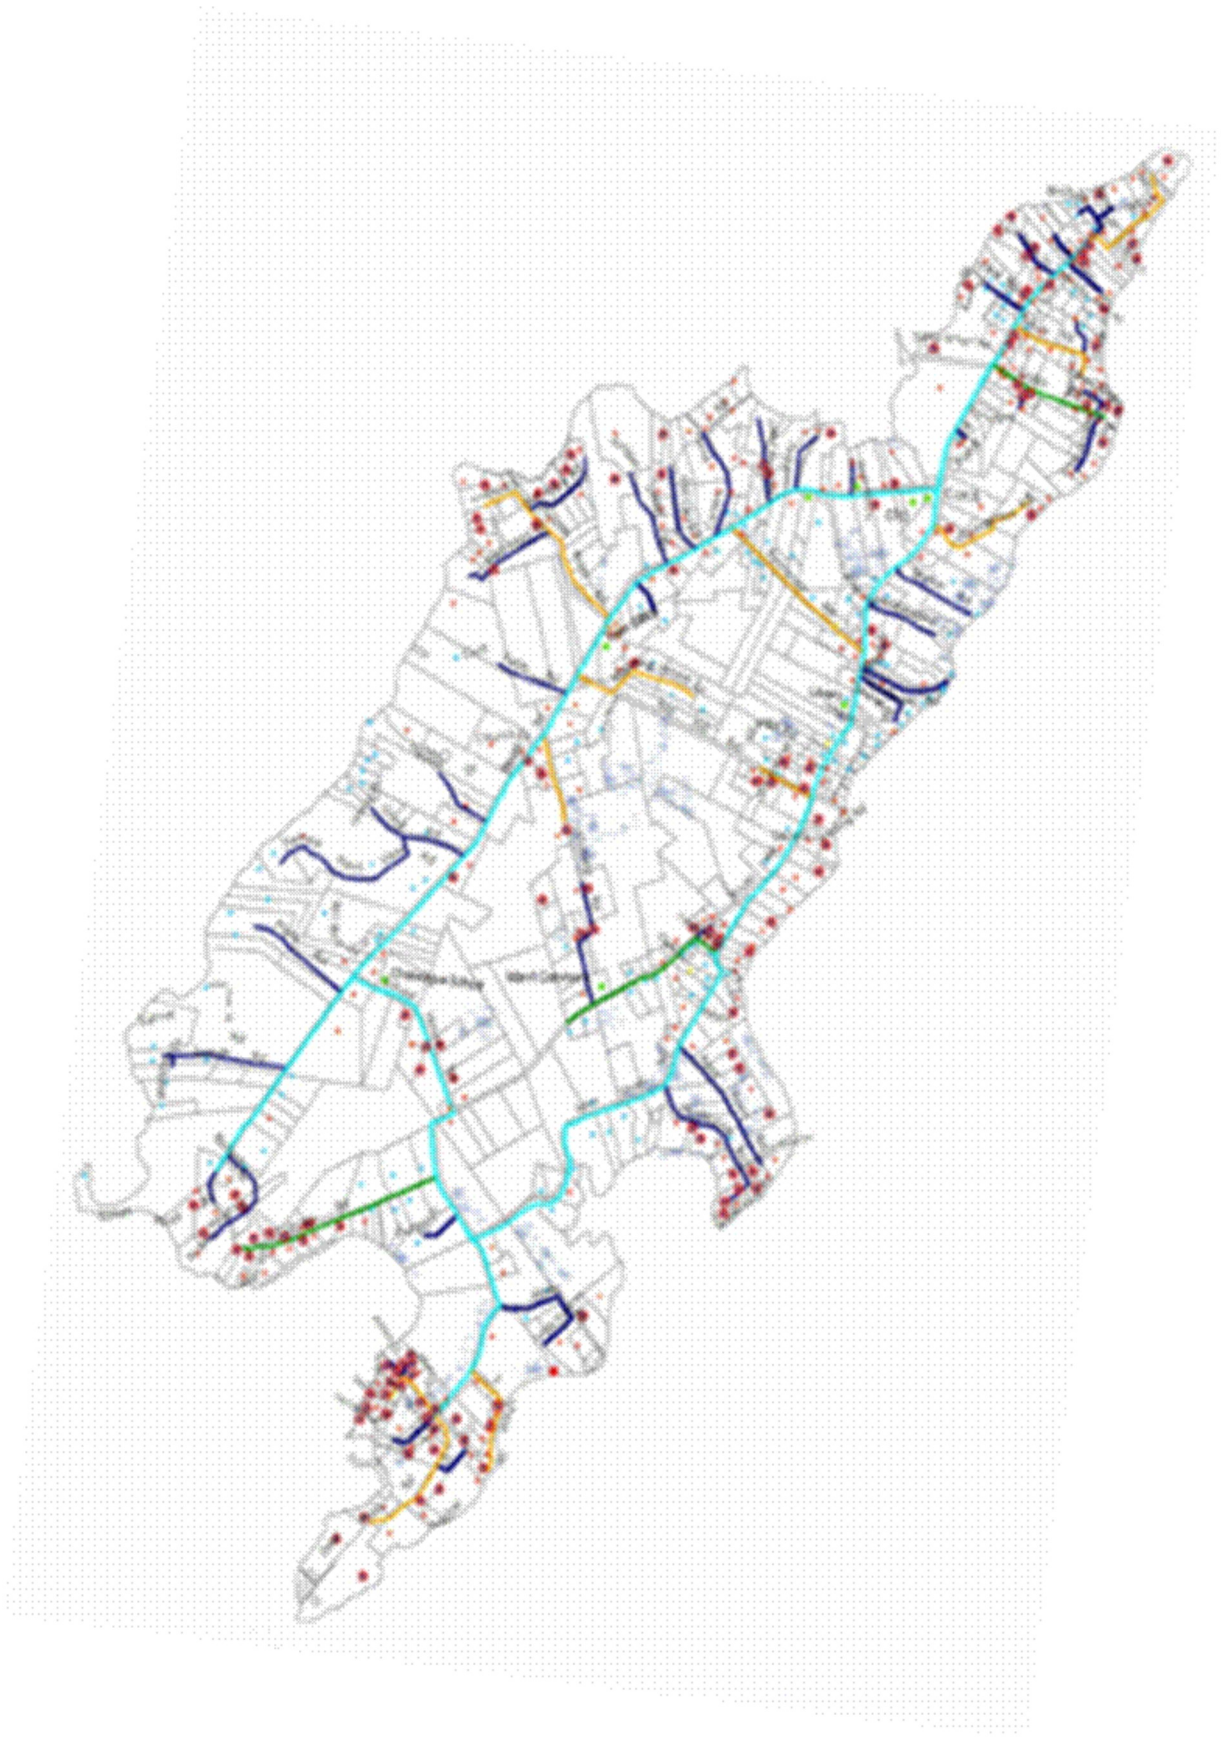

Looking ahead, we are expecting a 40' container as well as our final material load following behind!

May 8, 2024: While the cable is being strung around the Island, Bo and his crew are busy digging trenches for the Equipment Shed as well as for the power upgrade for the Town Office.
