Nate Conroy
"Conquering El Monstruo -
tales of a First Ascent in Chilean Patagonia".

Saturday - April 27th - 7:00pm at the Parish House

This year Nate completed a first ascent of El Monstruo, a massive granite mountain in Chilean Patagonia. This achievement began as a dream 4 years ago. It required three years of effort - building trails into unexplored valleys, hauling hundreds of pounds of gear and provisions across difficult terrain, assembling a variety of team members. In the end, Nate has built trails that the international climbing and trekking communities have already begun to enjoy, and set a 1630 meter (over 5300 foot) route up the granite face. We believe it is one of the longest moderate climbs in the world.
